

## CYBERSECURITY

- ◆ CyberSecurity is an ever present need across a company's internal facilities and endpoints through its' end consumer products. The need is not only to build CyberSecurity measures into the company and its' products by to manage, monitor and mitigate all situations as they occur.

- ◆ Return on investment can be driven from:

- ◆ Brand and Customer protection
- ◆ Elimination of risk from ransomware and malicious malware

## CYBERSECURITY

- ◆ DRIVEN-4 provides proven CyberSecurity experience and frameworks around:
  - ◆ Understanding your believed risk, address any myths and provide a roadmap to a secure product and corporate environment
  - ◆ Provide assistance to perform the necessary investigation, assessment and corrective action by conducting:
    - ◆ Penetration Testing & Vulnerability Assessments
    - ◆ Risk Management
    - ◆ Plan and actions for Mitigation
  - ◆ Educate and make your first line of defense your "employees"
